

BH-440

Sub-woofer True Bass Horn For Single 18"(440mm) driver is approximately one-half of a BH-880, and is intended for applications where size does not permit use of the BH-880. This unit is ideal where a limited height is available, such as under stages or under seating risers. We strongly recommend using these units only where two units are to be used side by side for coupling purposes, so the proper use of the low flare rate is achieved. In most applications where they will be separated by any significant distance, effectively identical performance can be achieved by using standard BH-800's, with considerable cost savings.

Performance Data

Operating Range: 48Hz to 200 Hz +-3 dB

Low Frequency Limit: - 10 dB 38 Hz

Sensitivity: 108 dB SPL 1w @ 1m (LF-443R)

Recommended Crossover: Less than 200 Hz 18 dB/octave

Power Handling: 300 w RMS / 450 w Program (LF-443R)

Dimension: 24"H x 72"W x 36"D

Configurations

BH-440-UL Unloaded bass horn for installation use

BH-440-LR As above, loaded with LF-443R driver
