

FR-352

High Output Compact Full Range Horn Load System for portable applications. This unit is similar to the FR-350-R with the substitution of the larger HF-590-A horn for two-inch entry drivers. This allows the system to handle higher power levels and corresponding higher sound pressure levels, with lower distortion throughout the mid band. The internal crossover has been optimized for the JBL 2445 driver and includes as standard a bi-amp switch and terminations. It is ideal for side-fill monitors on larger stages, sound reinforcement, motion picture and theater playback applications.

Performance Specifications:

Type: Thre-way horn loaded system

Operating Range: 50 Hz to 19,000 Hz

Sensitivity: 106 dB SPL 1w @ 1m

Power Handling: 250 w RMS / 400 w Program

Dimensions: 37"H X 30"W X 24"D

Configurations:

FR-352-UL Unloaded Enclosure with horns and crossover

FR-352-LR Loaded with LF-384R bass driver and CD-2070 VHF driver (requires JBL 2445)

Options:

Omitting VHF section, wheels, flight points and horns.
