

# CPL1264

## 2-Way Loudspeaker System

### DESCRIPTION

The CPL1264 two-way loudspeaker system sets the new standard in installation performance of compact loudspeakers.

The CPL1264 features 1 x 12-in LF woofer and 1 x 2-in HF compression driver. The HF horn features a square flange allowing the user to rotate it 90°. This way, the speaker can be mounted horizontally while maintaining the desired coverage pattern.

Advanced beamwidth matching crossover point selection transitions between the subsystems exactly where the HF horn's 60° (h) x 40° (v) coverage pattern matches the woofer's pattern. This eliminates the beamwidth mismatch that creates off-axis voids in the pattern of traditional two-way systems.

### Features

- 1 x 12 inch low frequency transducer
- 1 x 2 inch compression driver
- 60° x 40° coverage pattern
- Rotatable horn design

### Applications

The CPL1264 provides a high performance solution to applications requiring the use of a compact two-way loudspeaker system. Ideally suited to distributed approaches, these small, powerful systems mount easily in a variety of locations and provide consistent coverage over the entire frequency range.

### SPECIFICATIONS

#### CONFIGURATION

Subsystem:	<i>Transducer</i> LF 1x 12 in cone HF 1x 2 in compression driver	<i>Loading</i> Vented Rotatable Horn
Operating Mode:	<i>Amplifier Channels</i> Single-amp LF/HF	<i>External Signal Processing</i> HPF

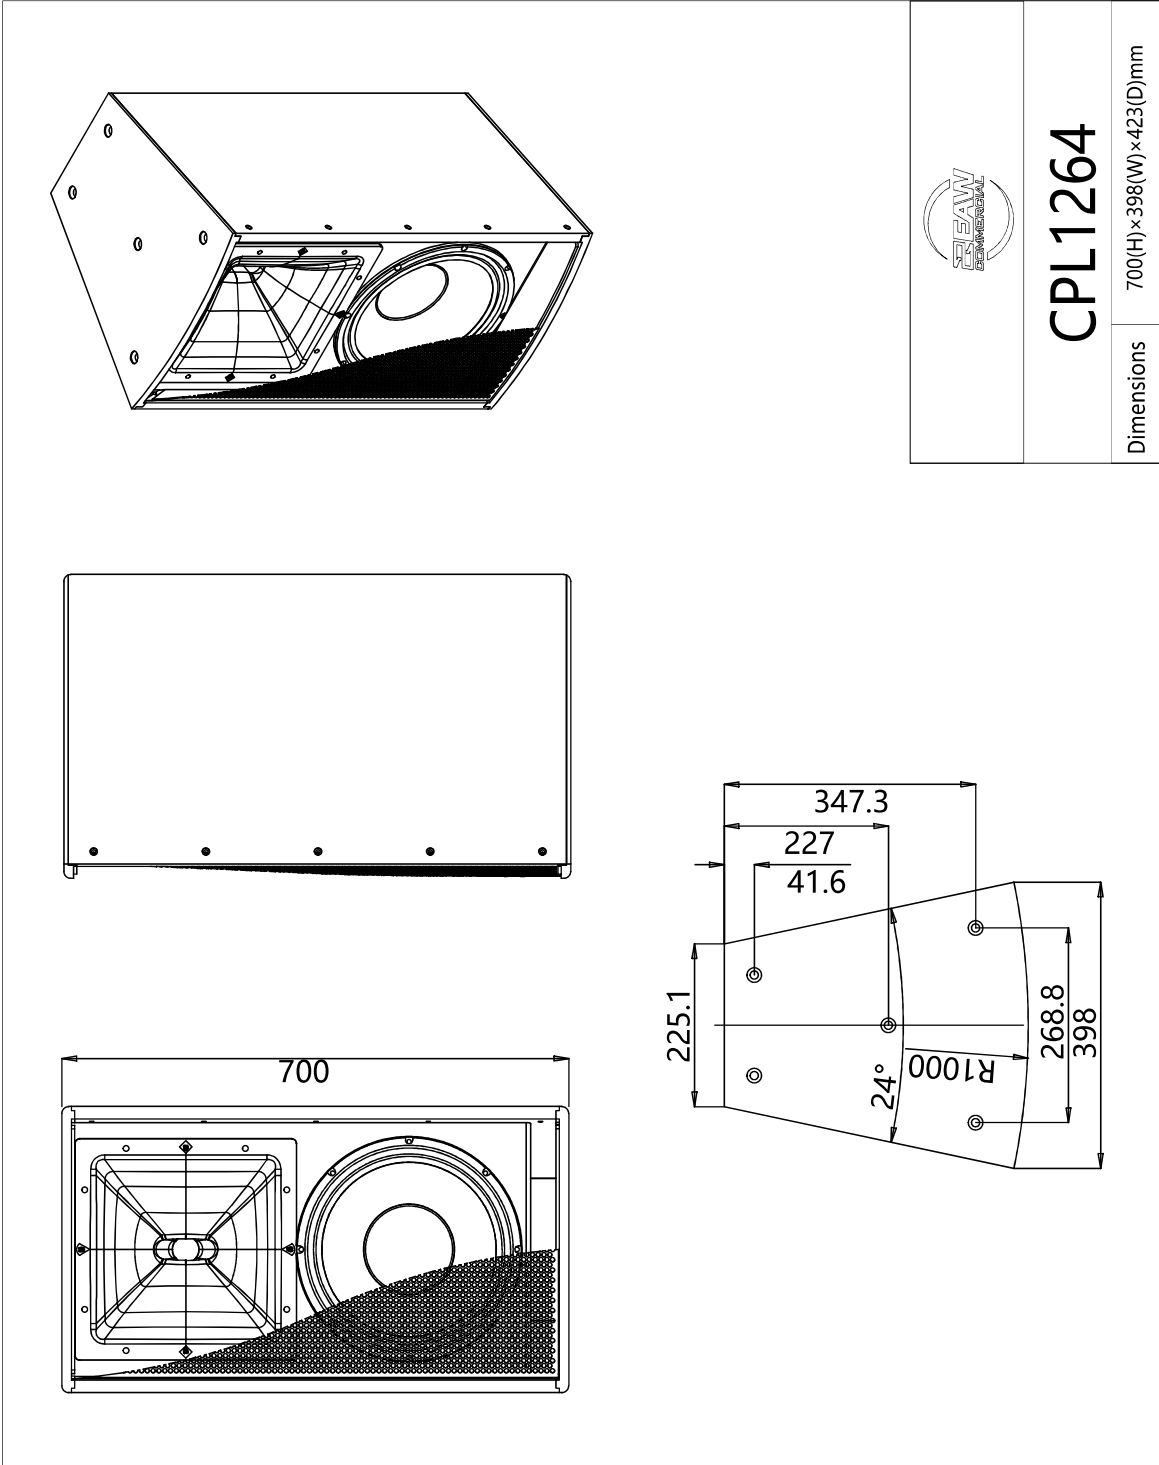

#### PERFORMANCE

Operating Range:	57 Hz to 20 kHz	
Nominal Beamwidth:	Horz 60°	Vert 40°
Axial Sensitivity (whole space SPL):	103 dB (1W@1m)	
Calculated Output (whole space SPL):	132 dB (Peak)	
Input Impedance:	8 ohms	
Power Ratings:	<i>Continuous</i> 200 W	<i>Program</i> 500 W
Dimensions:	700mm(H) x 398mm(W) x 423mm(D)	
Weight:	24kg	
Color:	Black
